

# ARS A/V Requirement Guide

## **Computer Requirements for the ARS Plug-in if using Live Polling**

1. Computer must be running Windows 7 or later
2. Must have .net framework 4.5.2 or later
3. Must be using Office 2010 or later

## **Power-point Requirements for Live Polling**

1. The ARS Plug-in is NOT Mac compatible
2. Keynote does NOT support add-ins like the ARS Plug-in
3. Mac Power-point does NOT support the ARS Plug-in

## **Running Live Polling**

1. The ARS Plug-in MUST be installed on each computer or laptop that will run or edit ARS enabled presentations
2. It is strongly recommended that each computer or laptop running ARS has a hard wired Internet connection, Wi-Fi can be unreliable and the best way to prevent a lost connection is to have an Internet cable

**Please contact CadmiumCD directly for the Power-point Plug-in if you do not already have access to it**

**Or you can download the latest version from the ARS task in the speaker portal**
